Aspen is committed to supporting ICU in the fight against COVID-19.

Maintaining medicine supply: Aspen is producing critical care medicines in its 23 manufacturing facilities located on 6 continents to sustain a continuous supply and contribute to save lives around the world. While we continue to put our employees’ health and safety first, we are dedicating all our efforts to meet the increasing needs of essential medicines to treat COVID-19 patients in ICU.

Supporting continuous education: Aspen is supporting major medical societies in organising educational sessions and others activities to keep healthcare providers up to date on recommendations, experiences and latest news on COVID-19.
